Abstract

LegacyTarekToken (BLT) is a BEP-20 standard token deployed on the Binance Smart Chain (BSC). The project introduces a sustainable, multi-product ecosystem comprising a Node & Ownership system, Free Mining, Paid Airdrop, Staking program, Software Solutions, and Payment Gateway utility.

The primary goal of BLT is to ensure trust, transparency, and long-term sustainability in the crypto industry — with no single owner and no central authority. All decisions are community-governed.

Introduction & Problem Statement

The crypto market faces three fundamental challenges:

Lack of Trust	Most projects are launched without identity or accountability.
Lack of Real Utility	Tokens are often created with no real-world use case.
Price Dumps & Instability	Hype-based projects collapse quickly due to uncontrolled selling.

BLT Solution:

- ✓ Node & Ownership reward model with daily vesting for 10 months
- ✓ Paid Airdrop with entry fee, daily BLT rewards, and transparent referral bonuses
- ✓ Free Mining program — earn BLT without upfront investment
- ✓ Staking program with multiple lock durations and 5-level referral commission
- ✓ Software Solutions for real-world utility
- ✓ Lifetime liquidity lock and 0% buy/sell tax
- ✓ Verified smart contract (GoPlus, Audit-ready)

Software Solutions

BLT Software Solutions is a real-world utility arm of the ecosystem. It provides technology services that can be purchased using BLT tokens, creating genuine demand and sustaining token value beyond speculation.

Web Development	Custom websites, DApps, landing pages, and portfolios built by the BLT developer network.
Mobile Applications	Android & iOS app development for businesses and crypto projects.
Smart Contract Development	BEP-20, ERC-20 token creation, staking contracts, airdrop contracts, and audits.
Blockchain Integration	Wallet connectivity, DApp backend, on-chain data solutions.
UI/UX Design	Crypto-grade interface design, dashboard design, and brand identity.
Payment Gateway	Accept BLT & USDT as payment on any website or platform.

All services are payable in BLT or USDT. Revenue generated is partially used for token buyback and ecosystem growth.

Security & Transparency

- ✓ 0% Transaction Tax (Buy & Sell)
- ✓ Lifetime Liquidity Lock — verified by Mudra
- ✓ GoPlus Verified Smart Contract
- ✓ Audit & CertiK readiness
- ✓ Community Governance system — no single owner
- ✓ On-chain referral detection — auto-credited, no manual claims

Global Developer Team

BLT is an ownerless project built by independent developers across 6 countries. No single individual or organization controls the protocol. Decisions are made collectively.

■■ Bangladesh	Core Development, Backend Infrastructure, Community Management
■■ Singapore	Security Auditing, Tokenomics Design, Exchange Integration
■■ Canada	Consensus Protocol Research, Cryptography, Developer SDK
■■ Congo	Mobile Wallet Development, Low-bandwidth Optimization, Africa Outreach
■■ Kuwait	Middle East Compliance, Arabic Localization, Gulf Partnerships
